

A word on our commitment to Mother Earth...

Australians are no strangers to conservation and recycling. It is second nature to invent products and systems that conserve water and raw materials when you live on a big island.

We are applying these principles to our whole company. Maniscalco is committed to making the world a cleaner and safer place to live. We are now launching our first wave of recycling information. We have developed two recycling logos. These will be placed on the appropriate marketing and products that we handle.

One logo reads “Contains post-production recycled material”. Post-production material is product that was intended to be made into something else. Due to breakage or deviation from the norm, it makes the product unusable for its first intended purpose. In this case, instead of trucking the unused product and dumping it in the landfill, the product is re-cut and mounted as a different item, thus extending the useful life of the original raw material. LEED points are not usually awarded for post-production recycled products.

The other logo reads “Contains post-consumer recycled material”. Post-consumer recycled products contain material that was originally sold as a different item. An example would be glass tiles like our Great Barrier Reef line that have a percentage of recycled bottles in them. In this case the product may be LEED eligible. The actual content of recycled material in any one of our products is shown on the pages that follow.

 **MANISCALCO**[®]
Australian for Mosaics™

We also want to inform people that we are recycling in every way we can. We already practice a green approach; some of our practices are listed below.

- We have timers on lights and fans.
- We turn off all lights when not needed. (Our warehouse and offices have skylights, thus reducing the need for lights on sunny days.)
- We recycle all wood by-products and scraps.
- We recycle all waste paper and cardboard.
- We use recycled packing peanuts and cleaners.
- We have recycled content in our re-pack boxes, sample boards, display racks and waterfall racks.
- We use recycled paper in most of our marketing materials, and are moving to more electronic methods of marketing like our quarterly newsletter and web site.
- Our new catalog is printed on FSC certified paper with 10% post-consumer waste content using low V.O.C. vegetable-based inks. Additionally we selected a printer who sponsors a tree-replanting program through the non-profit organization, "Trees for the Future." For every ton of paper used, our printer underwrites the replanting of 17 trees. *We used seven tons of paper, so we will be replanting 119 trees!*
- We recycle all pallets and crates.
- Our computers have black screen savers which reduces energy consumption.

As most of you know, it can cost more to be environmentally conscious, but there are also ways to save money if you take the time to look. We are making recycling a bigger part of our business and hope that you will also.

The following 11 pages is an alpha-numeric listing of recycled content by sku of all of our products. Please let us know if you have any questions regarding this list.

Cheers,
The Maniscalco Team
