Typical Uses

Pebbles mosaics can act as an accent in a stone or ceramic tile installation or be used in stand-alone wall, countertop, backsplash, and most floor applications. They are also appropriate for outdoor pool deck and fireplace installations.

Care & Maintenance

- Pebbles should be sealed before and after grouting and every 2-3 years thereafter with a penetrating stone sealer.
- Routine cleaning can be done with neutral, mild detergents and a stiff-bristled brush.
- For deep cleaning, a vinegar or 10% hydrochloric acid solution mixed with water can be used. Apply with a stiff-bristled brush and rinse thoroughly with water after cleaning.
- Pebbles are porous and can stain. It is highly recommended to quickly clean up any spills.

note: Expect variation in color and sizes within stone products.
